Question

1-1 Explain the behavior of the measured speed with respect to the reference speed in Step 5.

Answer

To perform the qualitative analysis below, the procedure to run the controller on the device must have been followed properly.

Mark:
4.0 of 10.0

Comments:
Please provide an explanation of what happens to the speed

Question

1-2 Explain the observed performance differences in Step 7.

Answer

As the proportional gain is increased, the response becomes more damped.

Your mark and any comments will be displayed below each question.
