

# How do I know who to make teacher vs a teaching instructor? What's the difference between them?

The screenshot shows a dialog box titled "Add Users to Course" with a close button (X) in the top right corner. Inside the dialog, there is a link "Create Classroom" in the top right. Below it, the "User Source" section has a dropdown menu currently showing "All users from my institution". The "Select users to add to this Course" section has an empty dropdown menu. The "Role" section has a dropdown menu with four options: "Student", "Student" (highlighted in blue), "Teaching Assistant", and "Teacher".

**Teaching Assistants** can view the dashboard, course user list and certificate progress.

**Teachers** in addition also have the ability to modify content.
