

Editing Step Options

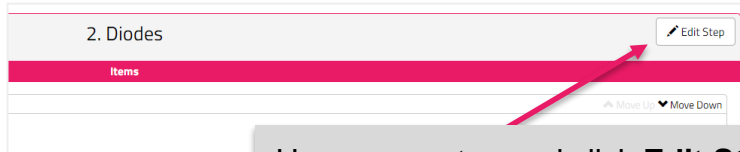

Navigate to step you want to edit

1

A form for editing a step. It has two input fields: 'Step Name' containing the text 'Diodes' and 'Step Description' which is empty. At the bottom, there are three buttons: 'Done' with a checkmark, 'Cancel' with an 'X', and 'Advanced' with a gear icon.

Edit Step Name and Step Description

3

Hover over step and click **Edit Step**

2

An 'Advanced' edit form for a step. It has the same 'Step Name' and 'Step Description' fields as the basic form. At the bottom, there are three buttons: 'Done' with a checkmark, 'Cancel' with an 'X', and 'Advanced' with a gear icon. A red arrow points from the 'Advanced' button to the 'Click Advanced for more options' text in the next screenshot.

Click **Advanced** for more options

Editing Step Options

Completion requirements will disable the following step until the student has viewed content, opened a file, opened just in time help or completed an inline assessment, or a combination of these.
By default, only content viewed is checked.

Step Name
Exercise: Diode Measurements

Step Description

Advanced Settings

Completion Requirements

- Files Opened
- All JIT Help Opened
- Inline Assessment

Step Prerequisites

- Lab Overview
- Diodes
- Simulate: Explore the Behavior of a Diode
- Implement: Observing Diode Behavior

Other Settings

Content Whitespace (%)
0

Step Prerequisites indicate which steps prior to this step must be completed before this step is available to the student.
By default, no prerequisites are checked.

Here you can specify how much whitespace will be filled right of the content as a percentage; however, a minimum content width will still be applied

Click **Done** to save your changes
